## Synopsis:

A werewolf and a hood bound by loss. A vampire haunted by his shameful legacy. A mysterious stranger who's more than he seems. How many monsters and secrets lurk in the halls of the WWL Corporation? Geri Kline's attempted estrangement from all things supernatural has her turning her back on her wolfslayer legacy, and worrying about more human things, like how to dress for the first day of your summer internship? Which shoes go best with silver daggers and crossbows? And how do you spy on your vampire bosses without getting caught? She's always heard that politics make strange bedfellows. Turns out, corporate espionage makes worse roommates. True, having a werewolf living with her might be the best security system ever, but half of the time, the danger they face is from each other. Both she and Tobias suffer from instincts that could drive them to ruin. Forcing themselves to work together and figure out what the corporate vampires at WWL are doing mixed up in a series of werewolf deaths may end in tragedy. Or worse still, friendship. Relinquished Hood takes readers further into the complex supernatural world of balances: slayers and vampires, hoods and werewolves. This imaginative urban fantasy series reinvents the classic Little Red Riding

Hood legend. If you like headstrong heroines, original fantasy worlds, and fresh takes on fairy tales, then you'll love *The Red Hood Chronicles*!
