Synopsis:

After battling a mysterious fire on the night of their thirteenth birthday, identical twins Meredith and Mallory Brynn awaken in the hospital with terrifying new powers: Merry can see into the past. Mally can see into the future. But their new gifts come with a heavy price: the mystical bond the twins have shared their entire lives is badly damaged. And now their small town is threatened by a looming danger only the twins can stop. That is, if they can harness their power before it destroys them both. The first book in a lyrical, haunting new trilogy, *The Midnight Twins* explores the unearthly connection between the Brynn sisters in the same thrilling prose that has made Jacquelyn Mitchard into a national treasure.
